

Parte 1

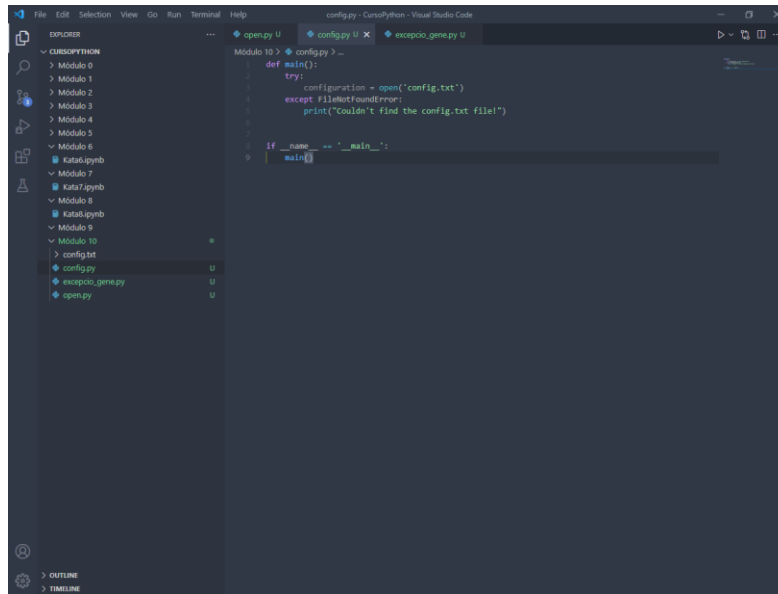

The screenshot shows the Visual Studio Code interface with the Explorer, Editor, and Terminal panels. The Explorer panel on the left shows a project named 'CURSOPYTHON' with a directory structure of 'Módulo 0' through 'Módulo 10'. The Editor panel in the center displays the 'open.py' file with the following code:

```
Módulo 10 > open.py > main
1 def main():
2     open("/path/to/mars.jpg")
3
4 if __name__ == '__main__':
5     main()
```

The Terminal panel at the bottom shows the command prompt output. It starts with a message about PowerShell, followed by the command to run the script. The output shows a traceback of the error:

```

The status bar at the bottom indicates the current file is 'main*' and the Python version is 'Python 3.9.10 64-bit'.
